OPEN SOURCE
ENDOWMENT

Board call
8 August 2025

Agenda

1. Roadmap
2. Fundraising
3. Investments
4. Grantmaking model

Roadmap

Governance

Key tasks to legally implement key OSE principles, ensure its community-driven governance model and enable its long-term scalability.

Target	Status
US nonprofit corporation	✅
Bylaws & key entity docs	✅
Initial board of directors	✅
501(c)3 charity status	⏳
Members' repo (private)	✅
Membership policy)	✅
Other key policies	
Finalized board of directors	

Grant-making

Key tasks to optimize the impact and efficiency of OSE's grant-making activities.

Target	Status
MVP for data-driven donations	✅
Draft grant-making model	⏳
Select asset manager	✅
Finalized grant-making model	
Implemented model infra	
First endowment fund income	⏳
First model-based grants	

Fundraising

Key tasks to increase the incoming flow of donations.

Target	Status
Co-founding donors	⏳
Bank wires (USD)	✅
Card payments	✅
Basic website	✅
Donation platforms	⏳
Landing page	✅
Stock donations	⏳
Fully functional website	⏳
Public GitHub repo	
501(c)3 platforms	
Crypto donations	⏳
Non-USD donations	⏳
API-based donations

Fundraising — Donors

COMMITTED TO DATE	11 Feb	27 Mar	7 Aug
# Donors committed	14	24	52
# Specified amount	7	17	47
# Members ($1K+)	7	17	36
TOTAL	**$232K**	**$457K**	**$751K**

DONATED TO DATE*	Net ($)	Gross ($)
Mercury (bank)	424,045.23	424,045.23
Stripe (card, etc)	22,768.02	23,865.00
PayPal (card)	98.45	100.00
GitHub Sponsors	10.00	10.00
TOTAL	**$446,921.70**	**$448,020.23**

* Only endowment fund, excludes $12k donation to operations account

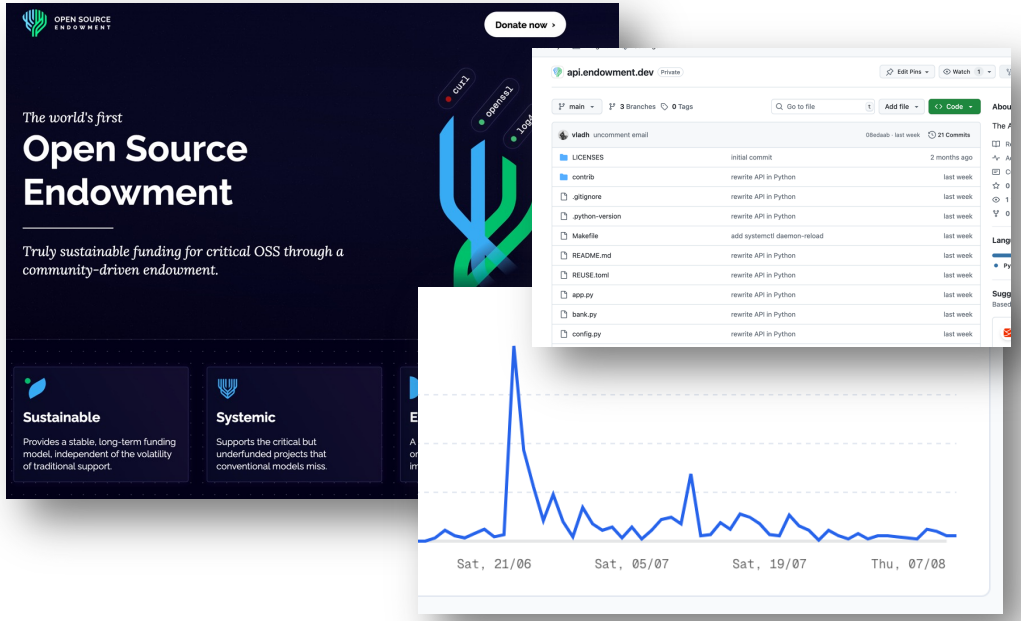
New notable donors:

- Kailash Nadh (Zerodha)
- Shay Banon (Elastic)
- Alexey Milovidov (ClickHouse)
- Nik Spirin (NVIDIA)
- Wes McKinney (Pandas)
- Evan You (Vue.js & Vite)
- Chris McCann (Race Capital)
- Sasha Vidiborsky (Atomico)
- Aaron Frost (HeroDevs)
- Mirko Swillus (Sovereign Tech Fund)

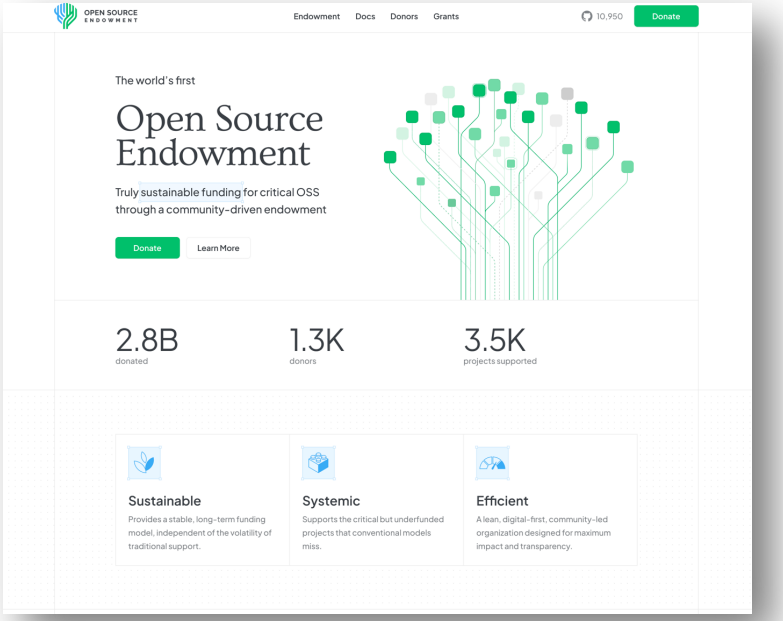
Early discussions:

- Bloomberg Philanthropies
- Navigation Fund
- Other institutions

Fundraising — Launch & Website



Endowment.dev
~1K users since our soft launch



Figma prototype (draft)
ETA ~ September

Investments

$447K donations collected to date:

- $101.5K invested in T-bonds ($100K nominal, 5%, 20 years)
- $345.5K to invest now, as we have a proper access to Vanguard

If all funds invested in the same bond issue:

- +$11,175 on Nov 15
- +$11,175 on May 15

Grantmaking model

Selection model draft proposal:

- Track dependencies across ecosystems:
  Pandas [Python] → NumPy [Python] → OpenBLAS [C]
- Estimate downloads based on dependencies:
  natural priority to low-level infra libs (C, C++, Fortran)
- Develop and open source tools for complex manifests, for instance, C/C++ with CMakeLists.txt (Ash is ready to help)
- All manual inputs are included in highlights (weights – TBD)
- Sort repos, review projects from the top, manually decide

Let's develop/agree on the framework, then ask donors

Ecosystems

- Detect **core** for all ecosystems: ~1% accounting for 99% downloads/deps
- Drill down cores to other ecosystems, e.g. Pandas [Python] → NumPy [Python] → OpenBLAS [C]
- **Natural** priority to low-level infra libs in C/C++, Fortran, etc.
- [Separated cores] → [Global dependency graph] → [Global core with estimated min downloads]

Value

- Dependencies:
  - (+) # dependents: package managers, thanks.dev, ecosyste.ms, own scripts, etc
  - (?) # dependencies: package managers, thanks.dev, ecosyste.ms, own scripts, etc
- Downloads
  - (+) # downloads: package managers, thanks.dev, ecosyste.ms, own scripts, etc
- Highlights
  - (+) Manual endorsements from OSE donors
  - (+) Manual endorsements from open source foundations
  - (+) Losses if removed from the global tree
  - (+) Incoming funding requests

Risk

- Complexity
  - (+) LOCs, maybe adjusted for ecosystem
  - ?? packages to estimate complexity
- Dev activity
  - (–) Active developers
  - (–) Bus factor: https://github.com/JetBrains-Research/bus-factor-explorer
  - (+) Time without any commits: GitHub API
  - (+) MTTR for issues: GitHub API
- Security
  - (+) OpenSSF score: https://scorecard.dev/
  - (+) Detected CVEs: https://www.cve.org/Downloads
- Funding
  - (–) # GitHub sponsors: GitHub API
  - (?) Existence of backers.md / sponsors.md / etc: GitHub API
